Turn & Talk

- Make a group of 2-3 and introduce yourselves!
- Discuss your Class Summary. What did you notice? Were there any surprises? Do you see any natural groupings of students?

“The most common source of reading difficulties is poor phoneme awareness. Hundreds of studies have highlighted its importance in reading development. Many studies have shown that PA training can improve the reading progress of weak readers.”

Phonemic Awareness Curriculum

Making the Most of

Heggerty

[Making the Most of Heggerty Workshop Recording](#)

Small Group or Whole Group?

- As a general rule of thumb, if about half or more of the class is not showing mastery of a skill, whole-group instruction will be most efficient.
- If ten or fewer students need support with a skill, it's likely that small groups will be more efficient.

(p. 60, Shifting the Balance, by Jan Burkins & Kari Yates)

Phonemic awareness work should be playful and fun!

Initial & Final Phoneme Isolation

Phoneme Isolation using the children's names in the classroom
Phonemic Awareness is easy and engaging to teach with children's names (here is an example)

Extension: Can move to a center activity with name cards with images

2,3,4 Phoneme Segmentation & Blending

Try it out!

1. **Can you guess my secret word?**
(hide card & make sounds in word)
2. **That's right,** (model segmented and blended)
3. Allow student to try segmenting and blending while touching dots.
4. Let your partner try one.

Phoneme Blending - Learning about the seasons - Spring images

Teacher : I am going to look at the picture and say the sounds in a “mystery word” you have to blend those sounds together to tell me the word. Ready...

- llll eeee ffff and see what word we get - leaf

- p-i-n-k What word do you hear? Pink

You can take vocabulary words from different subject areas like math, social, and science to teach all the PA skills -

To put it simply, phonemic awareness instruction is more effective when letters are involved. The National Reading Panel stated that “teaching children to manipulate phonemes using letters produced bigger effects than teaching without letters.

(National Reading Panel, 2000, p.2-4).

This does not mean that phonemic awareness without letters is ineffective, but that incorporating letters as much and as soon as possible gives us the largest impact.

Try it out!

- Find the items shown to the right.
- Choose a Word Chain List and tell your partner what letters are needed.
- Review letter names and letter sounds.
- Try giving decoding and encoding instructions.

Word Chain Lesson Instructions

1. Review the letter names of the letters that you will be using (T points, Ss name).
2. Review the letter sounds of the same letters (T points, Ss say sound).

****If Ss do not know the letter sounds that you will be using, this lesson is not appropriate. Ss must be able to produce the selected letter sounds in order to build words and blend them. In fact, the more automatic Ss are with the selected letter sounds, the easier it will be for them to blend the words.**

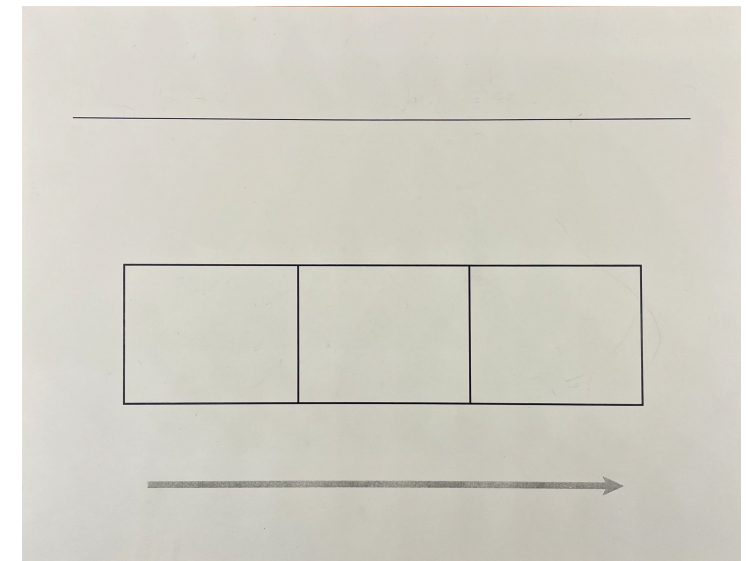

Blending/Decoding Focus

- T tells Ss which letter to move (remove & add). T can use the letter name or letter sound in giving this direction.
- Ss move (remove & add) the appropriate letter and then put their finger on the arrow below to blend the sounds, using connected/continuous phonation. Ss first blend slowly, then faster a second time.
- Repeat the above steps with next word on list.

Segmenting/Encoding Focus (Isolation, Deletion, Substitution)

- T tells students to make 1 change to make the new word: _____.
- Ss must figure out where the 1 change will be and remove/add letter to make the new word.
- Ss check their word by putting their finger on the arrow and blending the word to see if they have made the new word.
- Repeat the above steps with next word on the list.
- *After word chaining lesson is finished, dictate the same set of words to Ss. Ss hold individual whiteboards in 'portrait' orientation and write the dictated words in a list. This will help transfer these phonics concepts to writing!

Once you have tried both of the above methods with Ss, you can also alternate between them in the same word chain lesson.

Parts of a plant

Have the vocabulary words written on cue cards

Can you point to the part of the plant that begins with the sound /s/ and ends with the sound /s/

If the child points to the stem, you can stretch s t e m.. and say Stem begins with 's' and ends 'm'

What else begins with /s/
If they point to the seeds, give a high five, say, yes, it is "seeds" and give them the cue card to place on seeds.
