WHAT YOU NEED TO KNOW ABOUT AI

FOR SECONDARY STUDENTS

STAY SAFE

Be careful about the information you share with AI tools. Keep your personal information private and let your teacher or an adult know if something feels uncomfortable.

BE TRANSPARENT

Credit AI tools appropriately and disclose their contributions to your work.

YOUR JUDGEMENT MATTERS

Use AI-generated content as a starting point to spark your ideas. Add your own insights and final touches. Know when you may use generative AI tools and which tools are best to use.

CHECK FOR BIAS AND ACCURACY

Use critical thinking to verify AI-generated content and cross-reference with other sources.

USE AI ETHICALLY

Complete your own work and consult your teachers about approved AI tools. Understand that using AI consumes energy and other resources.

KNOW THE LIMITS

Be cautious with generative AI, especially on current or recent topics, as it may not provide the latest or most accurate information.
